Our Company

Mission

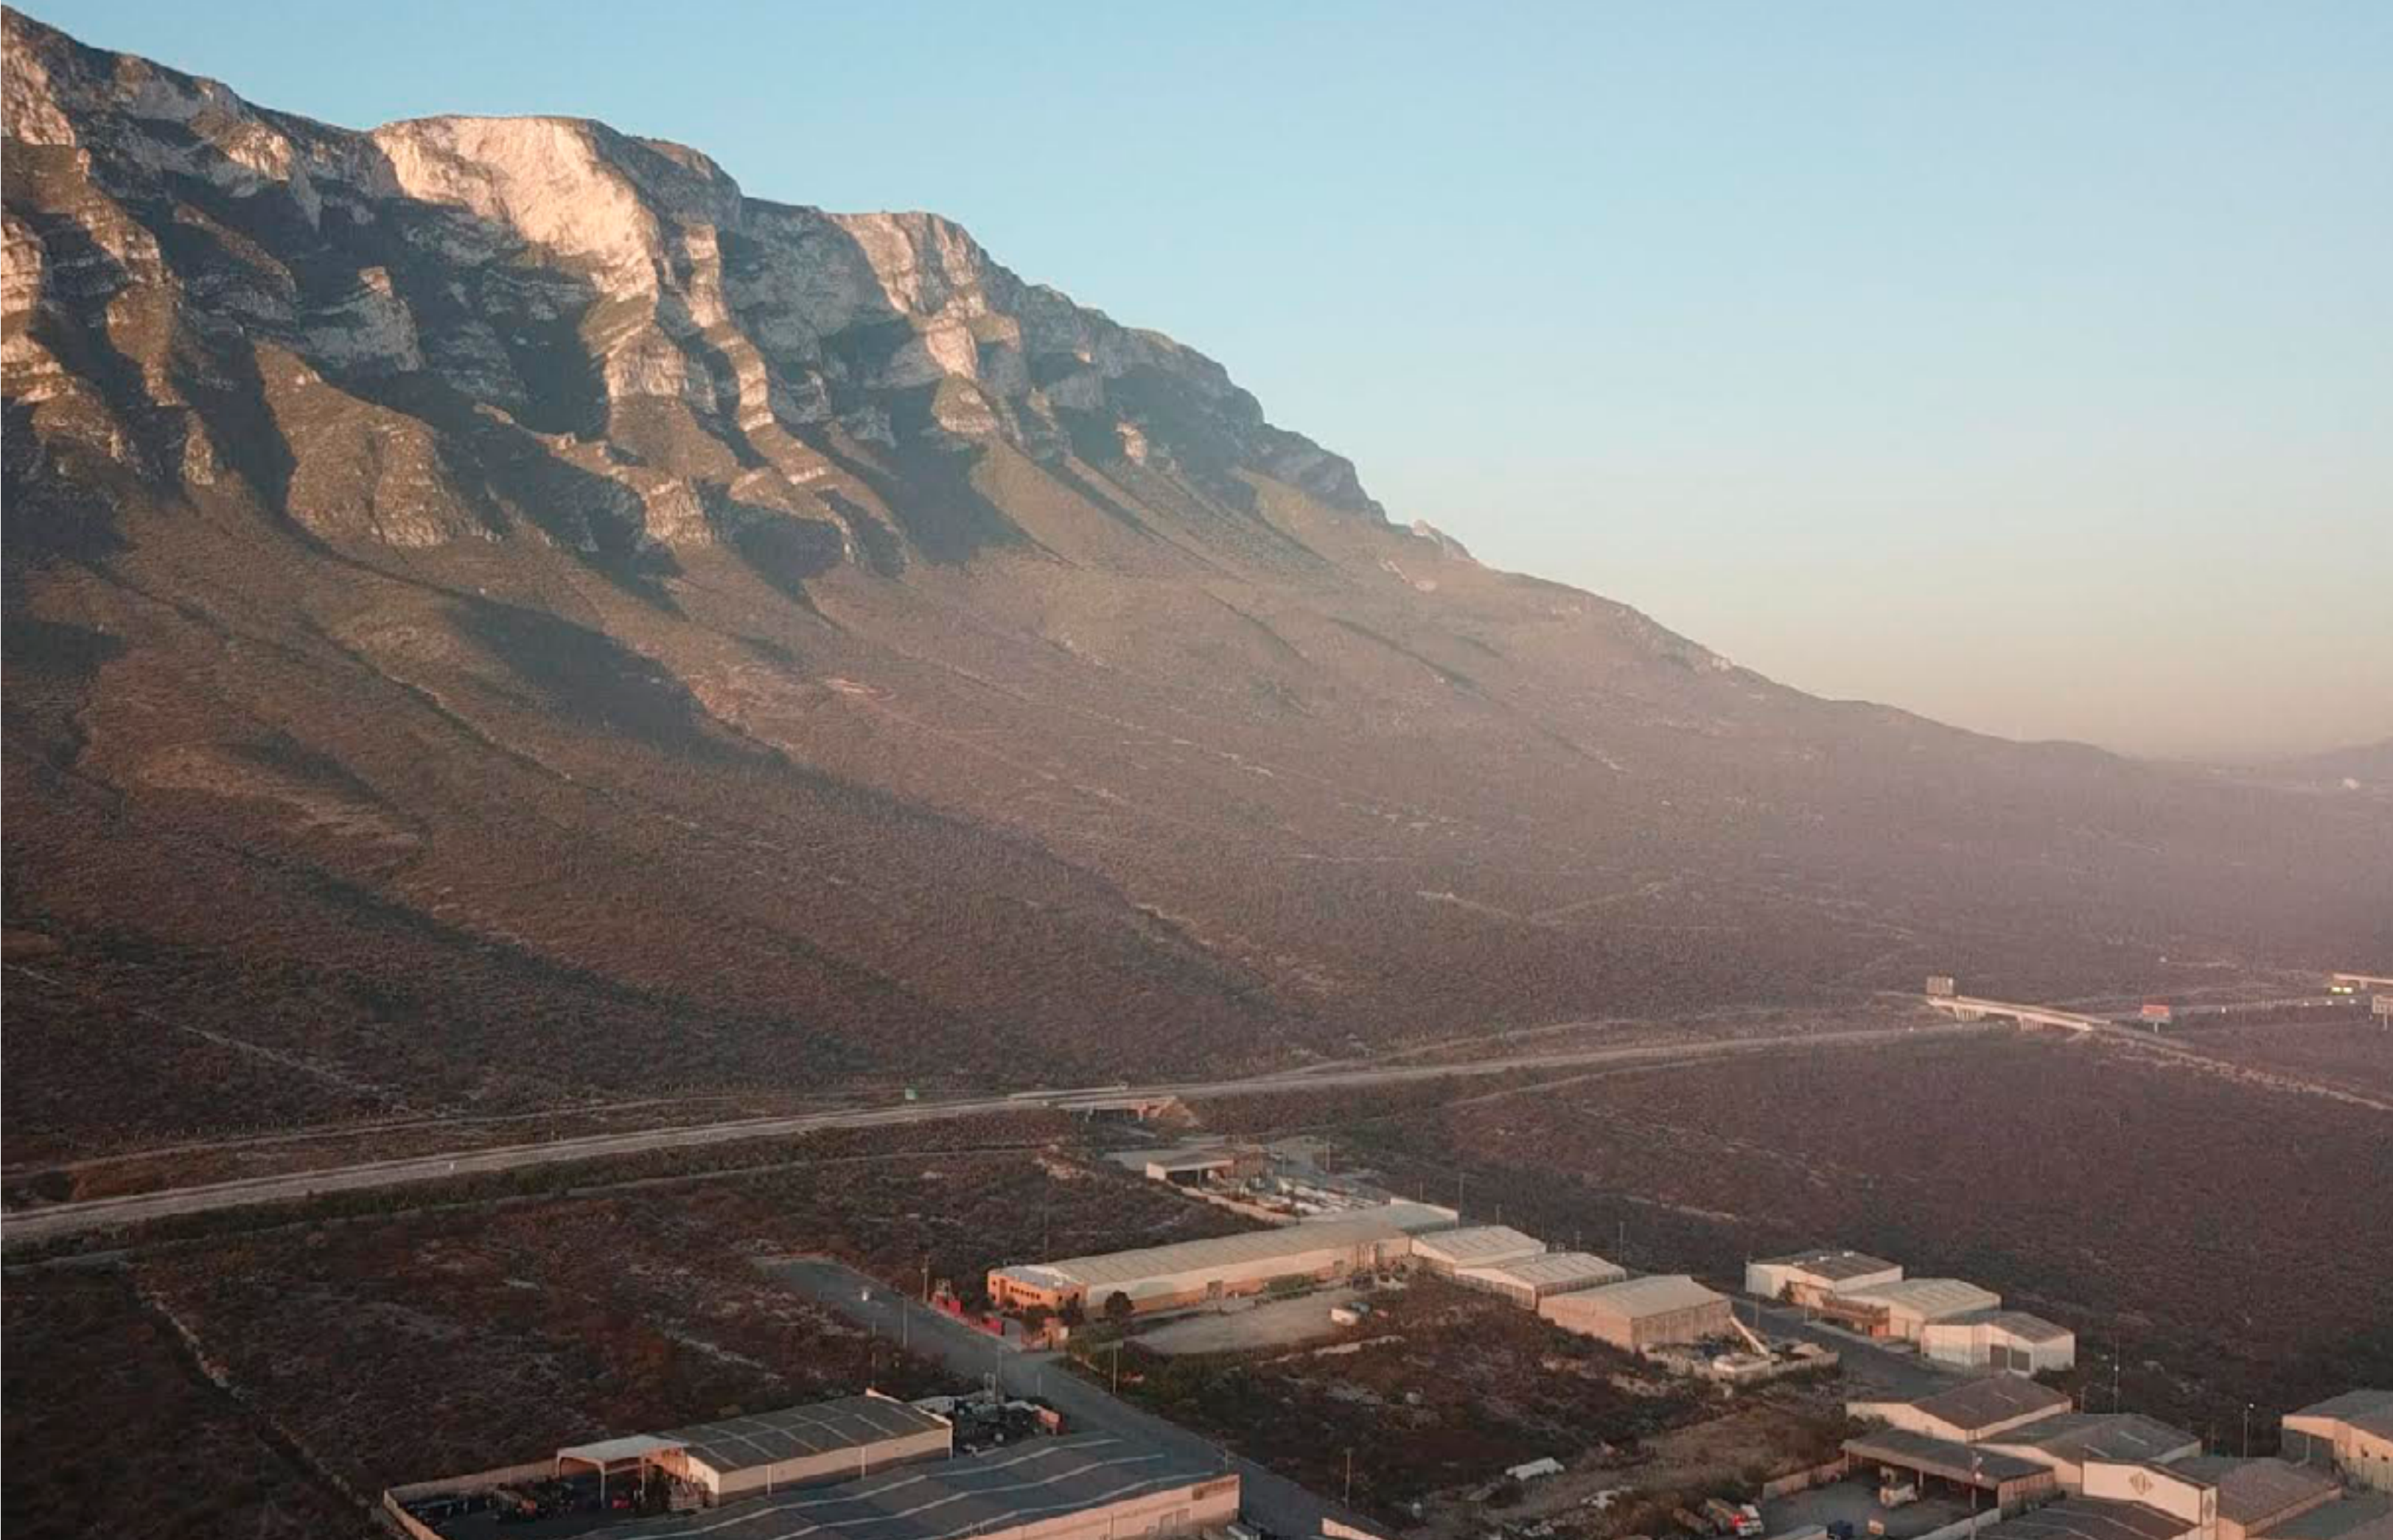

Alfran is characterised by always seeking Excellence in our Products and Services, which are Customised, in order to be the industrial Partner of reference of our Clients and to generate Value.

Vision

Our Vision is to Protect the Core of our Clients' Industry, so that they save Time and can Produce More and Better.

Values

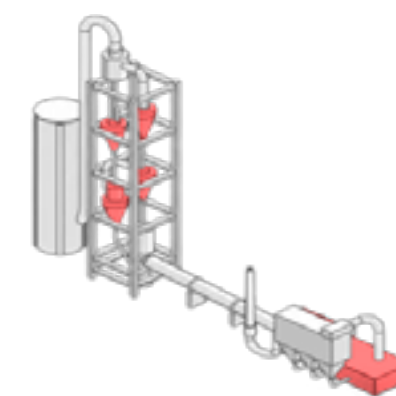

- Health and Safety
- Excellence
- Customer orientation
- Perseverance
- Passion and enthusiasm
- Collaboration
- Integrity
- Sustainability

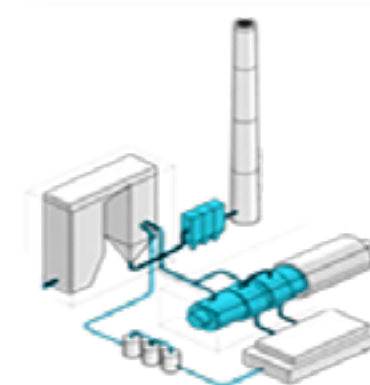

Certified quality since 1994

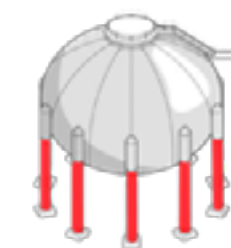

Alfran guarantees quality in all its projects, offering coordinated and integrated services, from engineering of solutions and product manufacturing, to on-site assembly and final delivery of the equipment.

alfran®

Solutions

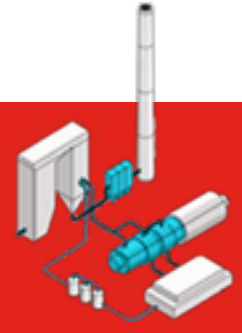

Refractories

ALFRAN designs, manufactures and installs a wide variety of refractories for turnkey projects in new production lines and maintenance work.

We have over 85 years of experience as a leading company on the refractory field. We protect the core of any industry requiring linings designed to withstand high temperatures and physical&chemical attacks.

Solutions

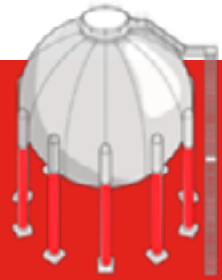

Insulation

Supply and installation of thermal insulation for heat and cold in boilers, turbines, tanks, equipment and pipes, for all types of industries.

These works are carried out in refineries, petrochemical plants, gas plants, nuclear plants, chemical and pharmaceutical industries, cement factories, cellulose and sugar mills, among others.

Solutions

Fire-proofing

ALFRAN offers a comprehensive passive fire protection service for all types of constructions, particularly for hydrocarbon fires in the oil and gas sector.

These solutions include advice on passive fire protection and current regulations, design and engineering of solutions, supply of tested and approved construction systems, and on-site installation.

Alfran is a manufacturer of FIREIND cementitious mortar, a lightweight mortar with high mechanical strength, resistant to external weather conditions. It doesn't contain asbestos and complies with all current safety requirements.

Solutions

Heat Treatment

Our company provides Heat Treatment for Welding and Refractory Dry out services internationally.

These solutions include preheating of welds, post-weld heat treatments and refractories dry out, with highly qualified personnel and our own equipment.

Industries

We have extensive experience in the following industrial sectors and their respective equipment.

See all our projects

alfran

Cement:

We are a reference in the cement industry worldwide specialized in high performance refractory castables.

- **CEMEX Maceo NEW PRODUCTION LINE**

<https://alfran.com/en/pf/cemex-maceo-new-production-line/>

Oil & Gas:

Alfran designs, manufactures, supplies and installs a wide variety of materials and solutions for plant applications in the Oil&Gas industry.

- **BORSTAR BAY3 / MCDERMOTT 2021 PROJECT.
MEXICO**

<https://alfran.com/en/borstar-bay3-mcdermott/>

Energy & Incineration:

Alfran provides products and services for power generation industries such as coal power, nuclear, combined cycles, cogeneration, incineration, biomass and solar plants.

- **PROJECTS IN IBERDROLA COMBINED CYCLE POWER PLANTS**

<https://alfran.com/en/pf/combined-cycle-power-plants/>

Iron & Steel:

Over the past 50 years, Alfran has become a leading supplier of products and services to the Iron & Steel industry.

- **REPAIR OF THE REHEATING FURNACE OF GRUPO GERDAU**

<https://alfran.com/en/pf/reheating-furnace-gerdau/>

Non ferreous metals:

Alfran designs, manufactures, supplies and installs a wide variety of materials and solutions for non ferrous metals industries, such as aluminum and copper.

- **JATCO FURNACE 3 PROJECT**

<https://alfran.com/en/pf/jatco-furnace-3-project/>

HEALTH & SAFETY

Alfran considers PREVENTION a VALUE integrated into all its activities and business lines, in technical procedures, in the organization of work and the hierarchical line at all its levels, being a fundamental part of the strategy and goals of GRUPO ALDOMER.

R&D+i

Technological Partner

Our greatest difference

We create more value through our innovation strategy, with ambitious targets and measurable results

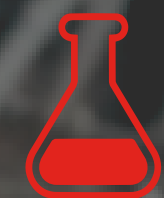

alnova

Research areas

Engineering of multilayer coatings for different industrial processes.

Design of refractory materials.

Energy Efficiency and Sustainability.

R&D+i Collaborative projects

- HORUS: Smart reheating furnaces for competitive and sustainable iron & steel processes.
- CERES: Advanced research in the field of mineral-based industrial waste.
- NEOSOLAR: Development of innovative parabolic trough solar thermal plant concept.

CIRCULAR ECONOMY

We minimise both the consumption of virgin raw materials and waste generation, closing the economic and ecological resource loop.

We have reduced the waste of our used refractory materials by
20% y 30%

A group of people in business attire are gathered around a table, looking at a large document. One person is pointing at a specific section of the document with a blue pen. The document appears to be a technical drawing or a complex diagram. The scene is dimly lit, with a blue tint, suggesting a professional and focused environment.

Continuous improvement

Our company is based on continuous improvement +digitalization, to adapt to a constantly changing world and to achieve our goal of competitiveness + excellence.
